

Course Title: Performance-Based Earthquake Engineering – 2024/2025

Lecturer: Gerard J. O'Reilly
 Dates: 05/02/2025 – 20/02/2025
 Hours: 48 hours (30 lectures + 18 tutorials)
 Location: Palazzo del Broletto, Piazza della Vittoria 15, Pavia, Italy

Description

This course covers topics related to performance-based earthquake engineering (PBEE) of new and existing buildings. A quick background on the development of PBEE is first provided, outlining its early beginnings, followed by the notable developments in the past 25 years that have led to the current and avant-garde approaches available in the literature. This relates to the design and assessment of buildings, particularly those commonly found in Italy and Southern Europe. The course focuses on the ingredients necessary for quantifying uncertainties, calculating risk, and estimating economic losses. Advanced topics such as risk- and loss-targeted seismic design methods are presented in addition to both simplified and extensive risk assessment methods available to practitioners. Other issues relating to regional assessment, ground motion and intensity measure selection to characterise seismic response are also covered. The course aims to provide students who are already familiar with current building codes and other standard seismic analysis methods with a better understanding of these advanced topics and state-of-the-art methods available within modern PBEE.

Grading

Coursework 40%
 Final exam 60%

Schedule

Date	Time	Topic	Classroom
Wed 05/02	09:00 – 12:00	1. Course Overview 2. Analysis Methods - Part I <ul style="list-style-type: none"> • Non-linear static analysis • Non-linear dynamic analysis • MDOF vs SDOF models • Incremental dynamic analysis (IDA) 	Sala del Camino
	14:00 – 17:00	3. Seismic Risk - Part I <ul style="list-style-type: none"> • Seismic hazard, logic trees and disaggregation • Fragility functions (FFs) • Derivation of FFs from IDA • Calculation of risk 	Sala del Camino
Thur 06/02	08:30 – 11:30	4. Ground Motion Record Selection <ul style="list-style-type: none"> • Code-based selection • Hazard-consistency • Conditional spectrum • Generalised conditional intensity measure (GCIM) 	Sala del Camino
	14:00 – 17:00	Tutorial: Part 1 - Identification of case study buildings, modal and pushover analysis Part 2 - Get the site hazard	Aula 1-17
Fri 07/02	09:00 – 12:00	5. Analysis Methods – Part II <ul style="list-style-type: none"> • Cloud analysis (CA) • Multiple stripe analysis (MSA) • Derivation of FFs from CA and MSA • Simplified analysis methods 	Sala del Camino
	14:00 – 17:00	Tutorial: Part 3 - Get the ground motion records for IDA Part 4 - Perform an IDA	Aula 1-17

Mon 10/02	09:00 – 12:00	6. Intensity Measures (IMs) <ul style="list-style-type: none"> • Traditional definitions and novel developments • IM choice – efficiency, sufficiency, practicality • Potential bias in structural response • Ground motion record scaling 	Sala del Camino
	14:00 – 17:00	Tutorial: Part 5 - Get the ground motion records for MSA	Aula 1-17
Tue 11/02	09:00 – 12:00	7. Seismic Risk - Part II <ul style="list-style-type: none"> • Demand-intensity models • Sources of uncertainty • Demand-hazard curves 	Sala del Camino
	14:00 – 17:00	Tutorial: Part 6 - Perform an MSA	Aula 1-17
Wed 12/02	09:00 – 12:00	8. Loss and Risk Assessment <ul style="list-style-type: none"> • Overview of loss assessment • Storey loss function-based assessment • Simplified risk assessment 	Sala del Camino
	14:00 – 17:00	Tutorial: Part 7 - Create storey loss functions	Aula 1-17
Thur 13/02	09:00 – 12:00	9. Risk (and Loss)-Targeted Design <ul style="list-style-type: none"> • Risk-targeted spectra • Risk-targeted behaviour factors • Yield-frequency spectra • Integrated performance-based seismic design 	Sala del Camino
	14:00 – 17:00	Tutorial: Part 8 - Economic losses and collapse risk	Aula 1-17
Mon 17/02	09:00 – 12:00	10. Regional risk assessment <ul style="list-style-type: none"> • Scenario-based analysis • Incorporating correlations (spatial, Inter- and intra-structure) • Taxonomies classification and fragility functions • Generating ground shaking and risk maps 	Sala del Camino
Tue 18/02	09:00 – 12:00	11. Future Directions <ul style="list-style-type: none"> • Downtime and functional recovery • Indirect losses 12. Typology-Specific Issues <ul style="list-style-type: none"> • Infilled frame structures • Unreinforced masonry structures 	Sala del Camino
Thur 20/02	09:00 – 13:00	Final Exam	Aula 1-17
